ISAR-6

Sixth International Symposium on Arctic Research

**March 2-6, 2020
Tokyo, JAPAN**

Arctic research: the decade past and the decade future

- Understanding the Arctic change and its accelerating and cascading impacts.
- How the Arctic research has contributed to the sustainable development.

Call for Special Sessions

www.jcar.org/isar-6/

Sixth International Symposium on Arctic Research

The rapid warming in the Arctic has been revealed, however, the precision of forecasting the future of climate and environmental change is still insufficient for utilization in sustainable development in the Arctic, while interests for resource utilization and economical activities are growing and progressing rapidly. The ISAR is aimed at presenting and discussing the scientific research results together with the Arctic researchers from all over the world, extracting and sharing issues to solve, and exploring the future of the Arctic. In ISAR-6, we are planning to discuss how the Arctic research has been progressing in the past ten years, and what we should do in the next ten years for the sustainable development.

ISAR-6 will consist of general sessions and special sessions. The general sessions will address the following topics: atmosphere; ocean and sea ice; rivers, lakes, permafrost and snow cover; ice sheets, glaciers and ice cores; terrestrial ecosystems; marine ecosystems; geospace; laws, politics and economy; language, culture and health; engineering for sustainable development. Special sessions will be solicited on cross-cutting themes, till May 6, 2019. Please visit WEB site (www.jcar.org/isar-6/).

We would like to invite you to attend ISAR-6, which will be held at Hitotsubashi Hall in Tokyo from March 2 to 6, 2020. It will be organized by the Japan Consortium of Arctic Environmental Research (JCAR) with the auspices of several institutions in Japan.

Young scientists and students are encouraged to attend by lower registration fee.

Presented papers in ISAR-6 are eligible to submit to the Special Issue (tbd) as a peer reviewed full paper in "Polar Science."

Important Dates

January, 2019

May 6, 2019

August 5, 2019

October 7, 2019

November 15, 2019

December 16, 2019

December 20, 2019

January 20, 2020

February 3, 2020

Call for Session starts, First Circular.

Call for Session ends. Session coordination starts.

Call for Abstract/Registration starts, Second Circular.

Call for Abstract ends.

Accept/Reject notice ends.

Oral/Poster notice starts.

Program Open, Third Circular.

Early Bird registration ends.

Registration ends.

Organizations (As of January, 2019)

Main Organizer: Japan Consortium for Arctic Environmental Research (JCAR)

Venue

Hitotsubashi Hall
National Center of Sciences Building 2F
2-1-2 Hitotsubashi, Chiyoda-ku, Tokyo
JAPAN

Secretariat

Japan Consortium for Arctic Environmental Research,
Arctic Environment Research Center,
National Institute of Polar Research
